Our vision

A prosperous and sustainable Nordic-Baltic region

NIB is an international financial institution owned by eight member countries: Denmark, Estonia, Finland, Iceland, Latvia, Lithuania, Norway, and Sweden.

NIB has the highest possible credit rating, AAA/Aaa, with the leading rating agencies Moody's and Standard & Poor's.

Our mission is to finance projects that improve the productivity and benefit the environment of the Nordic and Baltic countries.

Share of authorised capital (%) and rating by credit rating agencies Moody's and Standard & Poor's.

NIB has operated in Finland since 1976, providing approximately EUR 14.8 billion to more than 710 projects in the country.

In recent years, NIB has financed infrastructure improvements and energy transition in Finland. In addition, NIB loans have supported digitalisation, green buildings, and healthcare.

In 1975, Finland joined NIB as a member with the other Nordic countries.

Looking ahead, NIB plans to increase its sustainability-linked lending. Since 2021, the Bank has provided such loans to Helen and Metso, supporting the green transition.

Recent highlights

Manufacturing facility for advanced medical products

FinVector Oy

Construction of a manufacturing facility for advanced medical products in Kuopio. When the production unit under construction starts its operations, it will primarily focus on the production of a new viral-based gene therapy drug for bladder cancer.

Construction of a LEED Platinum level certified green building

Antilooppi Ky

Refurbishment of the historical building Siltasaari 10 in Hakaniemi. The property has received LEED Platinum, the highest level of certification in the LEED program, and is aiming for WELL Gold level certification, focusing on the health and wellbeing of property users.

Sustainability-linked loan for reducing carbon intensity and absolute GHG emissions

Helen Ltd

From the base year 2019 to 2030, the company is committed to reducing Scope 1 and 2 GHG emissions from electricity and heat generated, as well as to reduce Scope 1 and 3 GHG emissions from electricity and heat sold by 77% per MWh. The targets, officially approved by The Science Based Targets initiative, are in line with limiting global warming to 1.5°C.
