NIB in Lithuania

This is NIB

Financing with a purpose - our values

- Competence
- Commitment
- Cooperation

Our vision

A prosperous and sustainable Nordic-Baltic region

Our mission is to finance projects that improve the productivity and benefit the environment of the Nordic and Baltic countries.

NIB is an international financial institution owned by eight member countries: Denmark, Estonia, Finland, Iceland, Latvia, Lithuania, Norway, and Sweden.

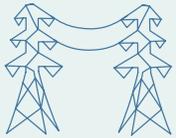

NIB has the highest possible credit rating, AAA/Aaa, with the leading rating agencies Moody's and S&P Global Ratings.

- Share of Lithuania vs total, %

Share of authorised capital (%) and rating by credit rating agencies Moody's and S&P Global Ratings. S&P Global Ratings withdrew local credit rating for Estonia in January 2025.

NIB has operated in Lithuania since 1994. The Bank has provided approximately EUR 2.0 billion to fund more than 135 projects.

Moreover, NIB has supported municipal investments, housing renovation programmes as well as investments aimed at strengthening the competition in the retail sector.

In 2005, Lithuania joined NIB as a member with the other Baltic countries. In 2025, NIB marks 20 years of the Baltic membership.

Looking ahead, NIB aims to focus even more on the green transition investments and increase cooperation with privately owned companies in Lithuania.

In recent years, the Bank has contributed to Lithuania's energy security, vital infrastructure improvements, and industry developments

Recent highlights

Upgrading Lithuania's public transit with new electric trains

UAB LTG Link

In 2024, NIB provided a EUR 100 million loan to LTG Link for the purchase of new electric and battery-powered trains.

The new trains will replace approximately one-third of the current passenger train fleet, offering improved comfort, reduced journey times, and better accessibility for passengers with reduced mobility.

The project will reduce CO2 emissions by an estimated 6,500 tonnes per year. The new trains will operate on popular routes throughout Lithuania, including Vilnius-Klaipėda, Vilnius-Varėna, and Kaunas-Šiauliai.

First gene therapy manufacturing facility in the Baltics

UAB Celltechna

Celltechna is constructing the first gene therapy manufacturing facility in the Baltics. The 8,000 m2 facility is located in Vilnius.

Lithuania's life science sector is rapidly growing, generating 2.5% of the nation's GDP annually. The facility is expected to create over 100 new jobs. Celltechna plans to build additional facilities in the area to form a biotechnology hub called BIO CITY.

Improving energy security

KN Energies AB

NIB has signed several loan agreements with KN Energies (previously known as Klaipėdos Nafta) for liquefied-natural gas (LNG) infrastructure developments in Lithuania. Since 2014, the Bank has provided financing in over EUR 300 million linked to the operations of Lithuania's LNG terminal "Independence". The terminal not only provides access to important energy resource during the transition to low-carbon economy but also plays a crucial part in the overall energy security in the Baltics.

Recently signed loans

UAB Vilniaus viešasis transportas

EUR 40 million

Purchase of trolleybuses and electric buses for public transportation in Vilnius.

Pienas LT

EUR 20 million

Milk protein production facility expansion.

UAB LTG Link

EUR 100 million

Electric and battery-electric trains for fleet renewal.

UAB Celltechna

EUR 22.5 million

Gene therapy manufacturing facility.

UAB LT Energija

EUR 100 million

264 MW wind farm in Pagėgiai region.
